SUMMARY

Full-Stack AI Engineer with 4+ years of professional experience across agentic systems, Python backend development, AWS infrastructure, process automation, and API quality assurance. Built production AI systems used by thousands of users and contributed to global enterprise agents and high-scale serverless platforms.

PROFESSIONAL EXPERIENCE

Full-Stack AI Engineer

PLEXUS TECH - Client: BBVA

02/2026 – 09/2026

Mexico City, Mexico

- Contributed as a member of Agent Blue's global core team, developing production tool modules used across global and Mexico-specific agent workflows.
- Enabled Mexico to adopt a global tools module by implementing reusable regional adaptation patterns, reducing duplicated development and accelerating local delivery.
- Developed production tools for global and local banking capabilities using typed Python models, validation layers, asynchronous service clients, and end-to-end testing.

Software Engineer - Backend, AI & Cloud

SIATECH

01/2025 – 12/2025

Remote

- Contributed to the development and operation of a serverless AWS platform supporting 12,000+ users and more than 60 million annual API requests with a Lambda error rate below 0.3%.
- Helped build and operate an LLM-powered WhatsApp agent processing 140,000+ monthly webhooks and 30,000+ LLM turns, generating more than 1,000 qualified leads with over 90% processing success.
- Reduced cost per request by 39% by optimizing MongoDB queries, batch access patterns, and application caching without degrading performance.
- Automated CI/CD across 20+ services with GitHub Actions and contributed to a suite of 7,000+ automated tests, replacing manual production deployments.

Software Engineer

FIXAT

07/2023 – 12/2024

Remote

- Owned the end-to-end design, implementation, and production deployment of a RAG-based conversational agent using Python, AWS Bedrock, LangChain, and the OpenAI API.
- Delivered the agent from initial prototype to production, where it was used by thousands of customers and improved lead-capture efficiency by up to 60%.

Python Automation / Digitalization Intern

BASF MEXICANA

01/2022 – 06/2023

Mexico City, Mexico

Automated operational workflows using Python, UiPath, and Power Automate and supported reporting initiatives with Pandas, SQL, and Power BI.

EDUCATION

INSTITUTO POLITECNICO NACIONAL - ESCOM | Mexico City, Mexico B.S. in Computer Systems Engineering | Jan 2025

SKILLS

Programming Languages: Python, TypeScript, JavaScript, SQL, Go

AI & Backend: OpenAI Agents SDK, OpenAI API, AWS Bedrock, LangChain, LangGraph, RAG, Pydantic, REST APIs, asynchronous HTTP clients

Frontend: React, Next.js

Cloud & DevOps: AWS Lambda, EC2, Fargate, S3, RDS, Step Functions, SQS, EventBridge, Cognito, WAF, Docker, CI/CD, GitHub Actions, Cloudflare Workers, Linux, Git

Databases: PostgreSQL, MongoDB, DynamoDB

LANGUAGES

Spoken Languages: Spanish (Native)

English (Professional Working Proficiency)
